10am-2pm

What is Paraoptometric Certification?

This program has been developed by a respected panel of American Optometric Association paraoptometric and optometrists, created to encourage continuing education and knowledge as the field of optometric assisting grows.

Why Become a Certified Paraoptometric?

The AOA Paraoptometric Certification Program can provide a formal declaration of education and skill achievement in the profession of paraoptometry. Increasing your knowledge of paraoptometry will give you the opportunity to improve your job satisfaction and your professional relationships with your doctor, your peers, and the patients you serve.

By becoming a certified paraoptometric, you may obtain the ability to become a part of the clinical team resulting in increased respect of the optometrist. Additionally, this program is designed for, and achievable with minimal assistance from the optometrist and a minimal amount of funds.

Why Should I Employ a Certified Paraoptometric?

The AOA Paraoptometric Certification Program will instruct your staff to make the most efficient use of time allowing you to operate at your highest level. A Certified Paraoptometric reinforces your professional image, which can only enhance patient satisfaction. This may result in additional referrals to your practice.

A Certified Paraoptometric demonstrates a commitment to the profession of paraoptometry, which results in an increased level of competence.
